Education

Georgia Institute of Technology | Atlanta, GA

August 2025 – May 2029

Bachelor of Science in Electrical Engineering; GPA: 4.0

- Stamps President's Scholar, full-ride merit award chosen on the basis of leadership, academics, and service
- Ron Brown Captain, professional development program for high-achieving African-American students

Skills

Programming: Python, Java, C++, JavaScript/TypeScript

ML & Data Science: scikit-learn, XGBoost, NumPy, Pandas, SciPy, RAG pipelines, vector embeddings, pgvector, model validation, hyperparameter tuning

Hardware & Embedded: PCB design, firmware development, IMU sensor integration, biosignal processing

Full-Stack & Tools: Next.js, Supabase, Git/GitHub, Google Cloud Platform

Certifications: RCR Basic, Good Clinical Practice, Group 1 Biomedical Investigators (all CITI)

Experience

Georgia Tech Student and Campus Event Centers | Atlanta, GA

April 2026 – Present

Community Hub Assistant

- Manage operations of three student community spaces enforcing Georgia Tech student policies and community guidelines
- Coordinated end-to-end programming logistics including event planning, facilitation, and targeted marketing campaigns in collaboration with the Graduate and Community Program Manager
- Handled administrative communications and student support through email correspondence and on-site staffing

Georgia Tech Tutoring and Learning Enrichment | Atlanta, GA

March 2026 – Present

Learning Assistant

- Facilitate problem-solving and conceptual understanding in STEM courses through office hours and small-group instruction
- Support course coordination and communication between students and instructional staff

EPIC Lab | Atlanta, GA

January 2026 – Present

Undergraduate Research Assistant

- Redesigned electrical system architecture for a powered exoskeleton module, enabling reliable field data acquisition
- Engineered custom IMU sensor interfaces to support multi-sensor data collection and sensor fusion pipelines in wearable robotics experiments

Inan Research Lab | Atlanta, GA

September 2025 – Present

Undergraduate Research Assistant

- Designed a supervised machine learning pipeline for time-series classification of SCG beats based on signal quality
- Applied biosignal processing and noise filtering techniques to improve classification robustness in physiological data
- Supported firmware development and PCB design for sensor data acquisition

Leadership

Wearable Exoskeletons and Assistive Robotics @ Georgia Tech (WEAR @ GT) | Atlanta, GA

Jan 2026 - Present

Treasurer

- Manage club finances, including tracking revenue, expenses, and budget allocations
- Establish financial systems and internal controls, including dues collection, reimbursements, and recordkeeping
- Review and approve funding requests, oversee expenditures, and support budgeting and merchandise sales

Projects

Corpus - Collaborative Research Platform | Atlanta, GA

Mar 2026 - Present

Developer

- Built and launched Corpus, a full-stack AI research platform for personalized paper discovery, document Q&A, and end-to-end bibliography management — serving real users from ideation to deployment
- Engineered an AI recommendation engine using vector embeddings, pgvector similarity search, and precomputed clustering to deliver low-latency personalized feeds and a daily paper workflow
- Implemented RAG-based document interaction pipelines including PDF parsing, LLM-powered Q&A, and automated summarization for structured analysis of academic literature
- Developed collaborative features spanning alerts, collections, and bibliography generation, architecting the system for scalability and multi-user research workflows
