Education

Georgia Institute of Technology | Atlanta, GA

August 2025 – May 2029

Bachelor of Science in Electrical Engineering; Minor in Computer Science; GPA: 4.0

- Stamps President's Scholar, full-ride merit award chosen on the basis of leadership, academics, and service
- Ron Brown Captain, professional development program for high-achieving African-American students

Relevant Coursework: Digital System Design (ECE 2020), Linear Algebra (MATH 1554), Principles of Physics II (PHYS 2212), Intro to Object-Oriented Programming (CS 1331), Data Structures & Algorithms (CS 1332)

Skills

Programming: Python, Java, Embedded C

ML & Data Science: PyTorch, scikit-learn, XGBoost, NumPy, Pandas, SciPy, vector embeddings, model validation, k-fold cross-validation, hyperparameter tuning, feature extraction, Matplotlib

Cloud & Tools: Google Cloud Platform, Supabase, Git/GitHub

Full-Stack: Next.js, JavaScript/TypeScript

Certifications: RCR Basic, Good Clinical Practice, Group 1 Biomedical Investigators (all CITI)

Experience

EPIC Lab | Atlanta, GA

January 2026 – Present

Undergraduate Research Assistant

- Fabricated custom IMU sensor cables (soldering + mechanical assembly) and redesigned the exoskeleton battery/Raspberry Pi enclosure, optimizing for weight reduction and structural durability; fabricated final version in SLA resin.
- Performed iterative prototyping using FDM and SLA resin 3D printing, targeting improved reliability and form factor.
- Assisted with motion capture data collection using wearable sensor instrumentation, supporting structured experimental protocols with human subjects in an IRB-compliant research environment.

Inan Research Lab | Atlanta, GA

September 2025 – Present

Undergraduate Research Assistant

- Designing and training a Temporal Convolutional Network (TCN) in PyTorch on multimodal physiological data (EEG, ECG, respiratory) from Parkinson's disease patients to classify levodopa usage state; applying Grad-CAM to identify predictive biomarkers.
- Porting HIKAF (Heart Rate Informed Kalman Filter) algorithm from Python to C for real-time on-device SCG fiducial point detection (AO/AC)
- Developed a classical ML pipeline using scikit-learn to classify seismocardiogram (SCG) beat quality; benchmarked Random Forest, XGBoost, KNN, Logistic Regression, and SVM for multi-class classification.

Leadership

Wearable Exoskeletons and Assistive Robotics @ Georgia Tech (WEAR @ GT) | Atlanta, GA

Jan 2026 - Present

Treasurer

- Manage club finances, including tracking revenue, expenses, and budget allocations
- Establish financial systems and internal controls, including dues collection, reimbursements, and recordkeeping
- Review and approve funding requests, oversee expenditures, and support budgeting and merchandise sales

HIVE Makerspace | Atlanta, GA

Jan 2026 - Present

Peer Instructor

- Managed front desk operations for a university makerspace including equipment inventory, user safety oversight, and sign-in/sign-out workflows
- Maintained FDM 3D printing infrastructure including print handling, user troubleshooting, filament management, and workspace upkeep

Projects

Corpus - Collaborative Research Platform | Atlanta, GA

Mar 2026 - Present

Developer

- Built and launched Corpus, a full-stack AI research platform on GCP and Supabase with an AI recommendation engine using vector embeddings and pgvector similarity search for low-latency personalized content delivery
